## HISTORY

Mount Welirang is an active volcano with an altitude of 3,156 meters above sea level in East Java, Indonesia. "Welirang" or Walirang (its ancient name) in Javanese means sulphur. Mount Welirang has areas of Hill Dipterocarp forest, Upper Dipterocarp forest, Montane forest, and Ericaceous Forest or mountain forest.

Welirang complex itself is located on two older volcanoes, Mount Ringgit in the east and Mount Lincing in the south. Fumarole areas with sulphur reserves and old coffee trees are found in a number of these mountainous locations.

Mount Welirang is under the management of the Raden Soerjo Grand Forest Park-Government Estate.

## PRODUCER

Smallholder Farmers

## LOCATION

 COUNTRY  
INDONESIA

 REGION  
EAST JAVA

 REGENCY  
BLITAR

 ALTITUDE  
1300 - 1500 MASL

## VARIETALS

ANDONG SARI

S795

## TECHNICAL

HARVEST  
MAY - AUGUST

PROCESSING METHOD  
FULL WASHED

CHARACTERISTICS  
CLEAN, MEDIUM ACIDITY, MEDIUM BODY, NUT CITRUS OLIVE  
SWEETENED
