## HISTORY

Since the ancient times, the road on Mount Gunitir has been the shortest connecting route between Jember Regency and Banyuwangi Regency. PTPN XII established the "Café & Rest Area Gunitir" which began operating on March 14, 2010 as a form of optimizing the BUMN's plantation land, in addition to staying focused on the main commodity business namely coffee, rubber, cocoa, tea, and timber.

In 1998, part of the forest area of Mount Gunitir was cut down by irresponsible people and converted private land. This causes the destruction of forest areas and trees that are tens of years old or more as well as an increase in the average air temperature. Until now, the forest area is still used as community plantation land with lease rights to Perum Perhutani.
